Sanford Diabetes Symposium

This symposium is designed to provide an update on the latest research and management of diabetes as well as the relationship between diabetes and other diseases. The target audience includes physicians, physician assistants, advanced practice nurses, nurses, dietitians, pharmacists and other interested health care professionals.

Learning Objectives

Upon completion of this program, participants should be able to:

- Identify the key challenges associated with medical treatment and management of hospitalized patients with diabetes.
- Examine common challenges in caring for hospitalized patients with diabetes.
- Review what a patient needs to learn about their diabetes before hospital discharge.
- Review diseases that are related to celiac disease, including diabetes.
- List nutritional concerns related to celiac disease.
- Define gluten-free diet.
- Recognize the difference between Type 1 and Type 2 diabetes.
- Review today's therapeutic options and research landscape related to diabetes.
- Discuss the concept of current research strategies and future treatment options related to diabetes.
- Review the AACE/ACE Diabetes Algorithm for glycemic control.
- Apply appropriate strategies for maintaining optimal glycemic control.
- Explore the causes, diagnosis and pharmacologic treatment of polycystic ovary syndrome (PCOS).
- Discuss the management of PCOS through diet and exercise.
